Professional Summary:

Multidisciplinary Systems & Software Engineer with experience bridging the gap between high-precision hardware engineering and full-stack software development. Proven track record of architecting cloud integrations, optimizing databases, and delivering enterprise-level applications in Agile environments. Expert in root-cause analysis and system troubleshooting with a "measure twice, cut once" discipline developed in the aerospace industry.

Software Skills:

Languages: TypeScript, JavaScript (ES6+), Java, Python, SQL, Ruby on Rails, HTML5, CSS/SASS, Linux Bash.

Cloud & DevOps: AWS, Google Cloud, Genesys Cloud, Terraform, CI/CD, Git, Jira, Agile Scrum.

Frameworks & APIs: React, Node.js, Express.js, RESTful APIs, OAuth 2.0.

Databases: PostgreSQL, MySQL, MongoDB, Firebase.

Testing & Quality: Jest, Cypress, Storybook, Mocha, Chai, Root Cause Analysis.

Skills:

- Excellent interpersonal, decision-making, problem-solving, analytical, and organizational skills;
- Ability to work well under pressure and to do multiple tasks;
- Ability to develop new approaches to complex design problems and perform high-level root-cause analysis;
- Skilled at communicating design rationale, building team consensus, and translating business needs into technical specifications;
- Ability to prioritize and manage work effectively to meet critical project timelines in fast-paced environments;
- Ability to work successfully both independently and within cross-functional teams, including senior developers and stakeholders;
- Committed to high-quality technical documentation and meticulous logging to ensure accuracy in system processes;
- Expert at bridging the gap between hardware engineering requirements and full-stack software development solutions.

Experience:

Full Stack Developer

Oct. 2023 – Present

Quantum Quench Hub, Toronto, ON

- **System Architecture:** Leading the development of a centralized social media reporting dashboard, integrating multiple third-party APIs to deliver real-time analytical insights;
- **Modular Design:** Engineered reusable custom modules using React and Node.js, reducing development cycles for new client projects by 20% and improving system efficiency;
- **Full-Stack Delivery:** Developed high-performance web applications for diverse industries including Real Estate and E-commerce using React.js, Express Server, and MongoDB;
- **Data Integrity:** Architected and optimized database schemas in MySQL and PostgreSQL to ensure maximum data security and system performance.

Programmer Analyst

May. 2022 – Jul. 2023

Connex Telecommunications Inc., Toronto, ON

- **Cloud Transformation:** Led a high-priority 4-month project to migrate an on-premises contact center to Genesys Cloud, configuring OAuth authorization and custom RESTful APIs;
- **Systems Integration:** Developed a bi-directional communication tool between legacy on-premises systems and AWS cloud infrastructure using Node.js, Terraform, and RESTful APIs;
- **Feature Engineering:** Designed and deployed a voice-to-text application using Google Speech-to-Text API and Node.js to automate customer service documentation;
- **Stakeholder Collaboration:** Translated complex business requirements into technical specifications, collaborating with senior developers and business analysts to maintain system scalability.

Jr. Developer

Nov. 2021 – May. 2022

Connex Telecommunications Inc., Toronto, ON

- Collaborated with senior developers to design, code, test, and maintain software applications and systems;
- Assisted in gathering and understanding system requirements by working closely with business analysts and stakeholders. Translated business needs into technical specifications;
- Wrote clean, efficient, and maintainable code under the guidance of senior developers, contributing to the creation and enhancement of software applications;
- Assisted in database design, management, and optimization to ensure data integrity and system performance. Learned to write effective SQL queries;
- Participated in the integration of software applications with third-party systems and APIs;
- Collaborated in the testing process, including unit testing and assisting in identifying and resolving software defects;
- Under the mentorship of senior developers, adhered to security best practices and compliance requirements to protect sensitive data and ensure network security.

Aircraft Maintenance Engineer

Oct. 2017 – Mar. 2020

Bombardier Aerospace, Toronto, ON

- **Critical Troubleshooting:** Performed complex hardware diagnostics and electrical system troubleshooting on high-precision aerospace machinery;
- **Quality Assurance:** Executed rigorous functional validation and testing protocols (ATP) to ensure compliance with strict industry safety standards;
- **Technical Documentation:** Maintained meticulous logs and technical reports, ensuring 100% accuracy in system snags and rectification processes.

Network Analyst

Nov. 2016 – Jul. 2017

Danesh Electronics, Montreal, QC

- **Infrastructure Ownership:** Managed and optimized Windows Server environments for SMB clients, ensuring continuous stability and proactively addressing potential hardware/software challenges;
- **Automation & Scripting:** Engineered and deployed automated backup solutions using **PowerShell**, reducing manual overhead and ensuring verifiable data integrity and disaster recovery readiness;
- **Identity & Security:** Administered **Active Directory (AD)** environments, managing user permissions and Group Policies (GPOs) to ensure secure access control;
- **Network Connectivity:** Configured and maintained secure **VPN gateways** and designed IP-based surveillance networks, optimizing storage and remote access protocols;
- **Incident Response:** Responded to critical technical incidents, performing deep-dive troubleshooting of network and server snags to maintain high service quality.

Education:

- **GrDip in Computer Science**, Concordia University, Montreal, QC
- **Diploma in Web Development**, Lighthouse Labs, Toronto, ON
- **B.S. in Aircraft Maintenance Engineering**, CATC, Tehran, Iran

Sep. 2020 – Sep. 2021

Oct. 2021 – Dec. 2021

Sep. 2007 – Aug. 2010
